The following is an examiner's statement of reasons for allowance: The subject matter of the present Claims 1-8 is considered novel over the closest prior art considered by the examiner. None of the documents discloses a polyurethane based on reactants a1) to a4), the specific molar ratios of the instant claims. EP-A-O 521 928 is regarded as the closest prior art, already discloses aqueous basecoats with a bonding agent obtained by radically polymerising ethylenically unsaturated monomers (A) with a polyurethane resin (B). This leads, in particular when used on metal substrates, to coatings with greater resistance to condensation (see Claim 1: page 1, lines 46-49; page 8, line 54 to page 9, line 3; and the examples). The polyurethane as per EP-A-O 521 928 D1 does not, however, contain the special mixture of aliphatic and cycloaliphatic diisocyanates and, in addition compounds which correspond to component a3) in the present claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
